

8, 7, 8, 7, 21, 10 (10.6 average). Each sentence but one begins with subject-verb. Short sentences of constant structure grow tiresome. I have now illustrated my point. You are surely fatigued. A longer sentence would be welcome. (The authors should study and emulate the style of the praising preface written by Walter Shelley, who knows exceedingly well how to craft interesting sentences.)

But the bottom line still says, "Take a look at this work," for few attempt what it attempts. It comes close enough to its goal that most students, not knowing otherwise and not wishing to invest much money and reading time, would likely be happy and learn much from it.

Richard M. Caplan, M.D.
